**Highlights**

Everything lost is meant to be found

Over 10 million pets are lost each year in the United States alone.

...

It's not just pets; **we lose countless hours** each year looking for lost possessions and the replacement costs are in the **billions**.

Introducing The **AirBolt® GPS**

The AirBolt GPS (Alternative Video): Global Tracking Like it Was Meant ...

AirBolt® GPS is the smart solution to all your tracking needs. When possessions or our dear p enough.

That's why we created The AirBolt® GPS, a tracker perfect for every situation.

Who needs more of those panicky "OMG WHERE IS MY....?" moments?

We're human; we misplace things; we have no idea how the keys got left in the fridge or where searching for the cat and catching the bus the next morning because we couldn't find our key:

Something had to be done because...

Nothing else was good enough

Don't get us wrong, we tried with other off-the-shelf trackers. Most were too big, and the cat wouldn't wear them. A few were just the right size for the keys (barely), but with a battery life of ONLY a few days (if not a few hours). Having to charge every few hours or days was just too stressful, and we just couldn't be bothered to put the keys on charge or use a docking station that often. After all, if we put our keys in the same place every time, we wouldn't be losing them, would we? Honestly, when it came to Bluetooth trackers, they just didn't cut it. Once our beloved pet or valuables were out of range, they were no good.

So we said...

It's time to innovate

Just like when we created The AirBolt® - The Truly Smart Travel lock, we knew we had a problem to solve, and we wanted a tool to tick all the boxes. So, we took a good hard look at what people needed in a great GPS tracker. With every new design we created, it always came back to a few critical points:

- | GPS trackers need to be small
- | Battery life must be extra long
- | Alerts need to be customisable to what you are tracking
- | The design needs to be discrete
- | Friends and family should be able to share access
- | Forget Bluetooth; we need a device we can track anywhere
- | The GPS needs to be sturdy and weatherproof

We created a **feature rich GPS**

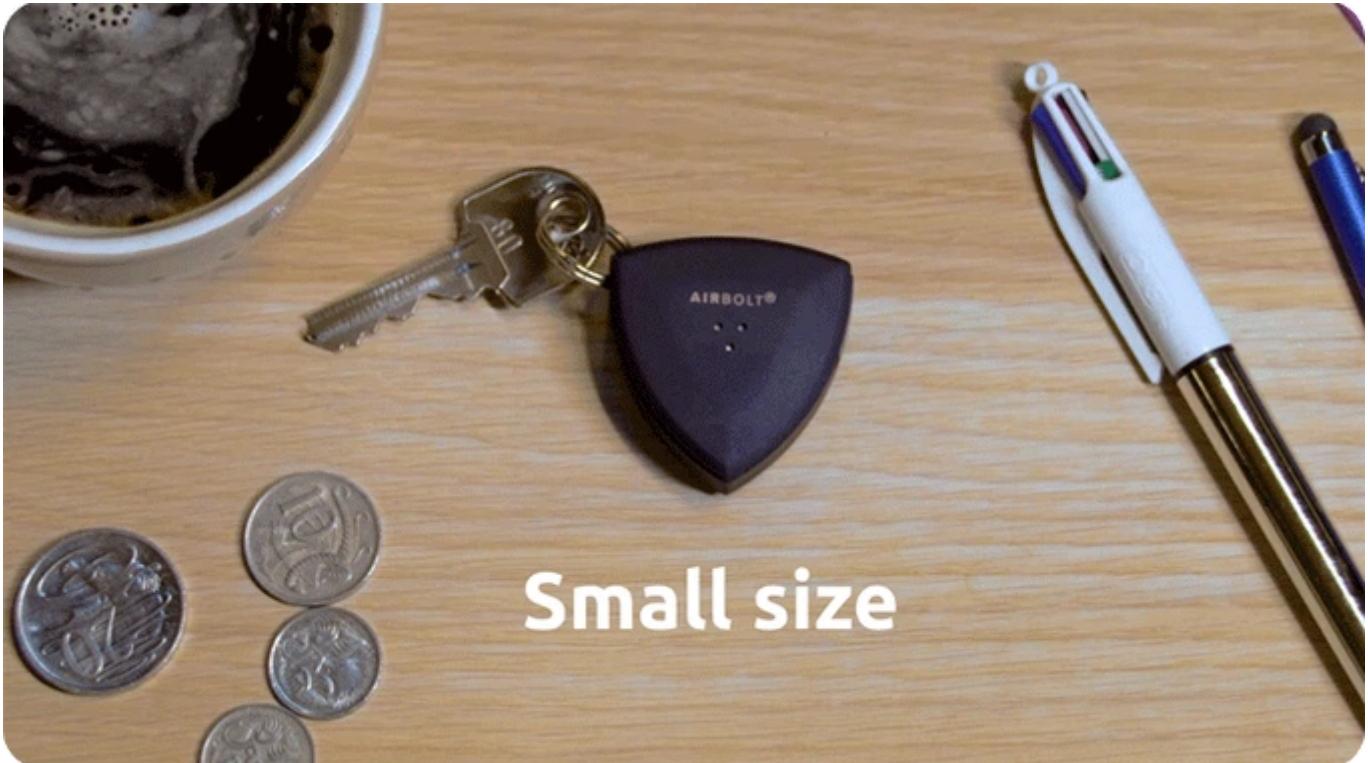

What we came up with is The AirBolt® GPS. This tracker is perfect. It's small, only 37mm x 34i (approx. 21 grams, 0.75oz). This means it can be hung from a collar or slipped discreetly in a pocket. We decided we needed to use GPS.

We took our tracking to the next level, however, by implementing location over LTE-M / NB-IoT networks. This way we would have the perfect balance of indoor, outdoor and nearby tracking. You could track belongings globally.

 Global LIVE Tracking	 GPS + LTE-M + NB-IoT
 Up to 12 months battery life	 Waterproof
 Geo-Fencing	 Separation Alerts
 Durable. Strong ABS + Anodised Aluminium	 Rechargeable via USB-C (included)
 Water Alarm	 Light Weight 21 grams (0.75oz)
 Bluetooth Long Range + Direction Finding	 Also talks to your AirBolt® Lock
 Small Size 37mm x 34mm x 11mm	 Alert Button
 Accelerometer	 Temperature Sensor
 LED	 Loud Buzzer
 Future Proof with OTA updates	 Perfect for Indoor & Outdoor Tracking

World's smallest GPS + LTE-M/NB-IoT tracker

lasting up to **12 months** per charge

**OH! The AirBolt® GPS can even talk to the
Award Winning AirBolt®: The Truly Smart Travel Lock.**

Fits into your life

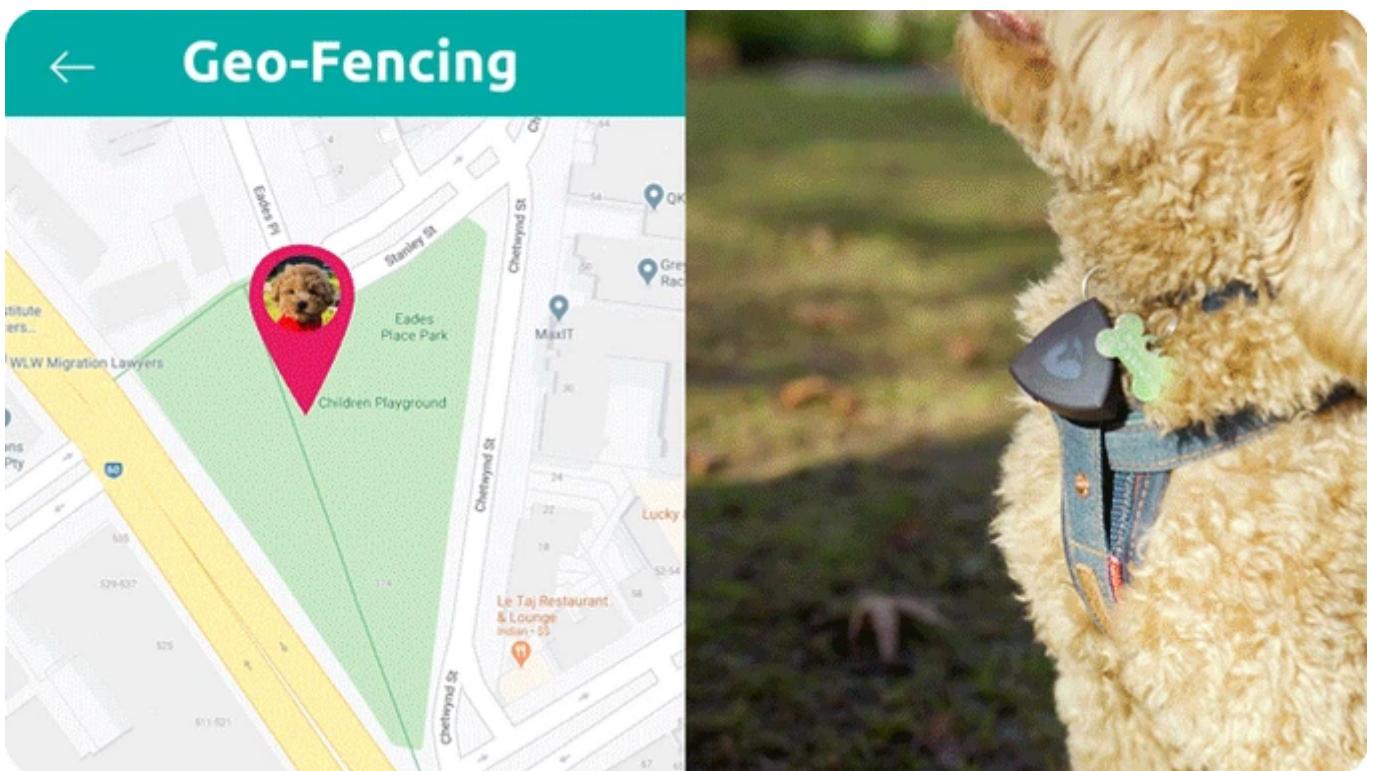

We are so proud of what The AirBolt® GPS can do. There are so many uses for every lifestyle t

The AirBolt® uses LTE-M/NB-IoT & GPS with the capability to provide quick and accurate location tracking. And the list of covered countries is growing rapidly! Nearby tracking is also possible without signal subscriptions if you don't want one!

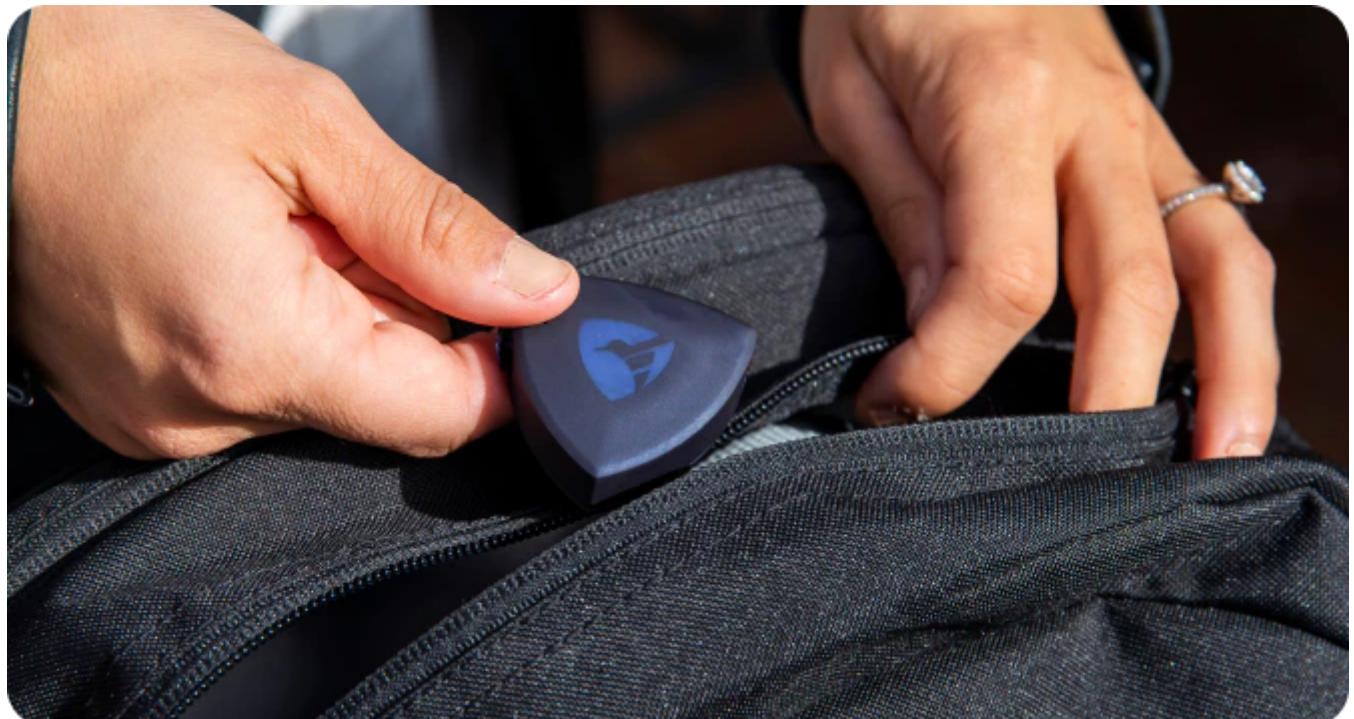

Never lose your furry friends

Losing a pet is terrifying, so we designed the AirBolt® GPS to make lost pets a thing of the past. **mind at ease.** Set up Geo-Fencing and Separation Alerts, so you will immediately know if they message if someone else finds your pet.

Keep track of your kids and their things

Use AirBolt® GPS on a child's backpack. Perfect for when they start walking to school themselves or items that are missing or forgotten. Check the tracker at school pickup and see if they've left something behind.

If your child gets lost, a quick press of the **alert button** sends you their location immediately.

Track purses, keys, bikes, luggage, the lot - anything

Track anything

Separation Alerts

Not a morning person? Don't worry about leaving your bag on the train, track your items and : your belongings.

You can even share access with your family, friends, colleagues or employees. Everyone can keep an eye on you via the app's safety feature when travelling alone - share your location with friends and family so they know where you are.

The options are **endless**

Track your equipment, gear or even drones with our small, and VERY lightweight device. The / hobbies.

Durable and Waterproof - Perfect for outdoors

Nature lover? The AirBolt® GPS is waterproof up to 1m (for 30minutes) with a built-in alert to your AirBolt® GPS and allow friends and family to know where you are surfing, skiing, hiking,

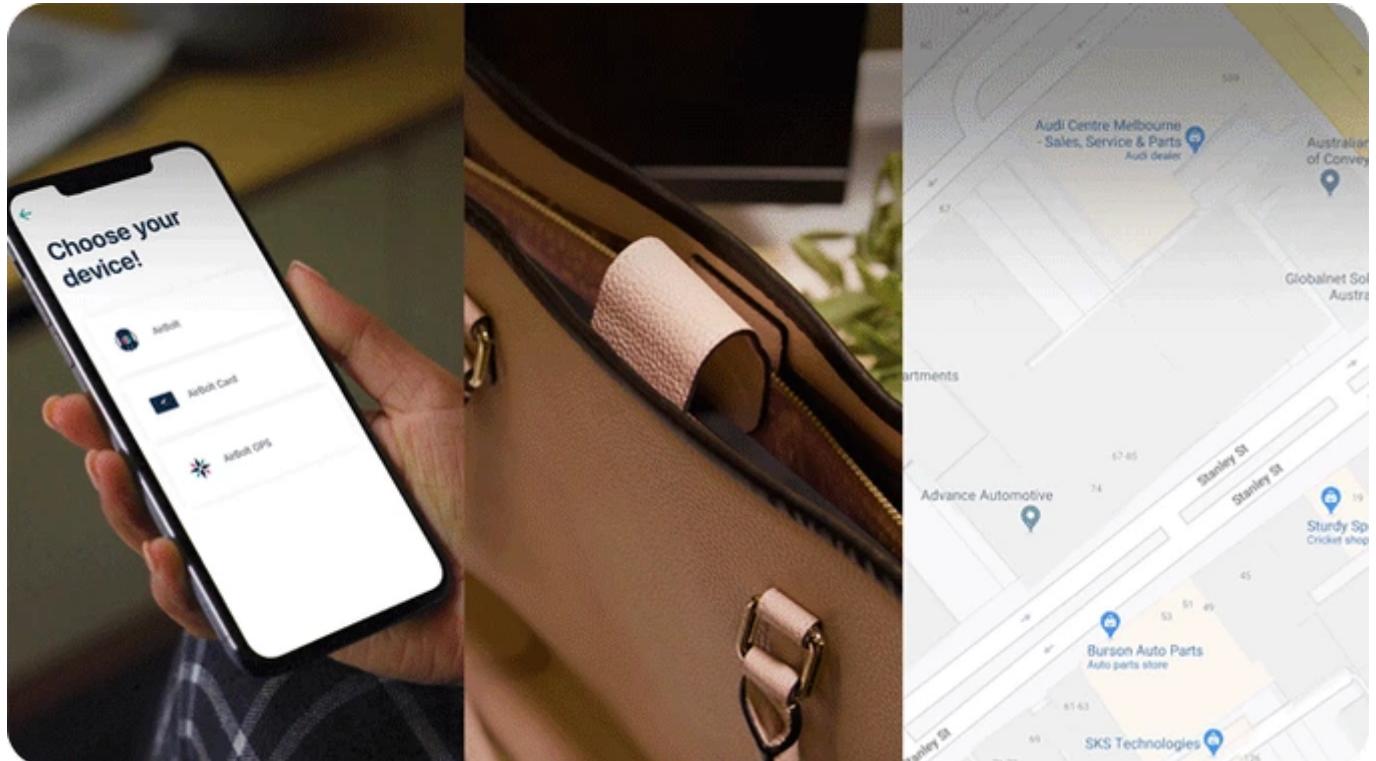

Monitor Tools, Vehicles and Equipment

Worried about your vehicles, tools or work equipment? The discrete size means you can plug in your toolbox without worry.

Monitor when your equipment is being used or borrowed and where it's going. Put one in your expensive equipment cases. You can even set up a proximity alarm and geo-fence to alert you

It's so simple to set up

1 YEAR STANDARD AIRBOLT WARRANTY

What about shipping

We have made the conscious decision to calculate and charge shipping closer to the time of shipping. Due to the environment and lack of global flights, the pricing is significantly higher than what it should be to result in cost savings to our backers.

Below are our estimates for shipping costs:

1 AirBolt® GPS	2+ AirBolt® GPS
\$7 USD (\$10.50 AUD)	+ \$5 USD (+ \$7.50 AUD) per unit

**Prices do not include taxes and VAT. That will be subject to the laws and regulations of each individual country.*

Meet the Team

In order to create great design, you have to have a great team. Meet the team at AirBolt, we've Australia and abroad. We work hard to bring you cutting edge products using world-class mat be designing and creating in Melbourne, Australia.

Not our first rodeo

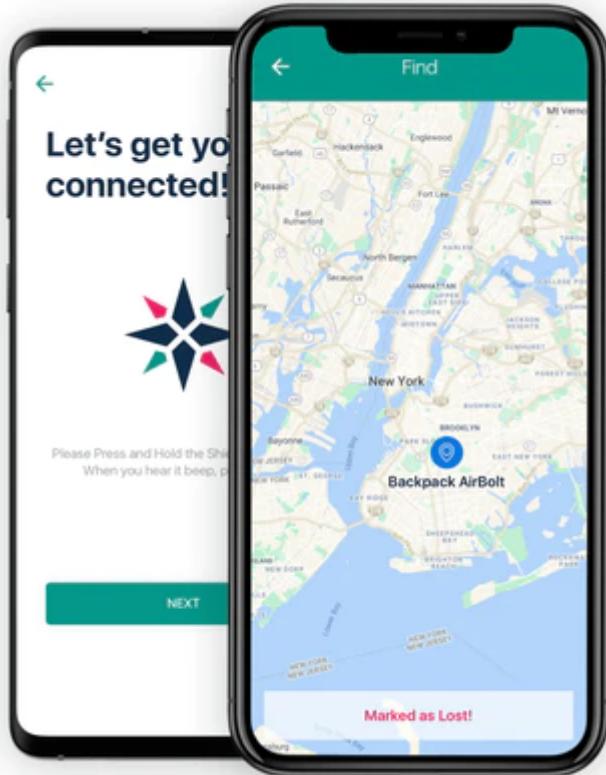

We launched back in 2015 with our first Kickstarter campaign and have been bringing products to life since then.

We know what it takes to deliver a quality product which solves a problem, provides a true sense of satisfaction & utility

World Class Design

From start to finish, we aim to create a strong, durable and beautifully-designed product. Ever release a truly smart accessory. We don't stop after release either, our team is constantly updated to always get the best service and latest functionality.

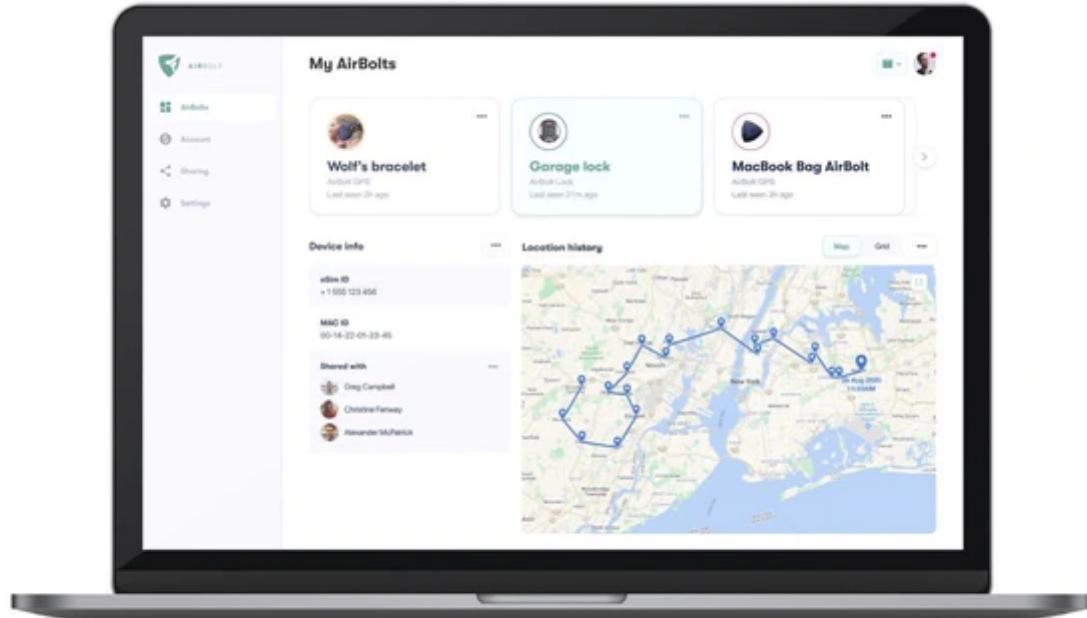

Our timeline from start to finish can be viewed below. We estimate shipping to our backers by Indiegogo. With the current international timeline, this estimate can change but we will keep you updated.

This is your passport to your AirBolts. The APP will enable you to track, manage, control, share and use your devices.

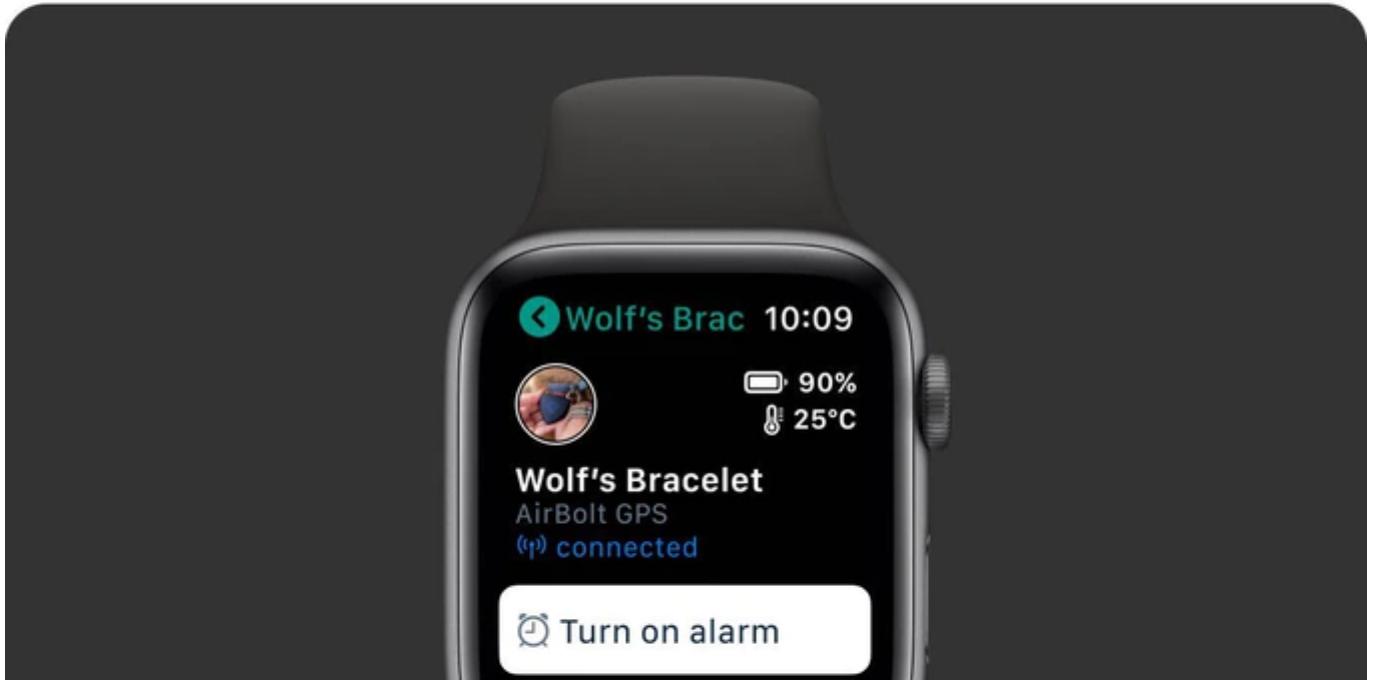

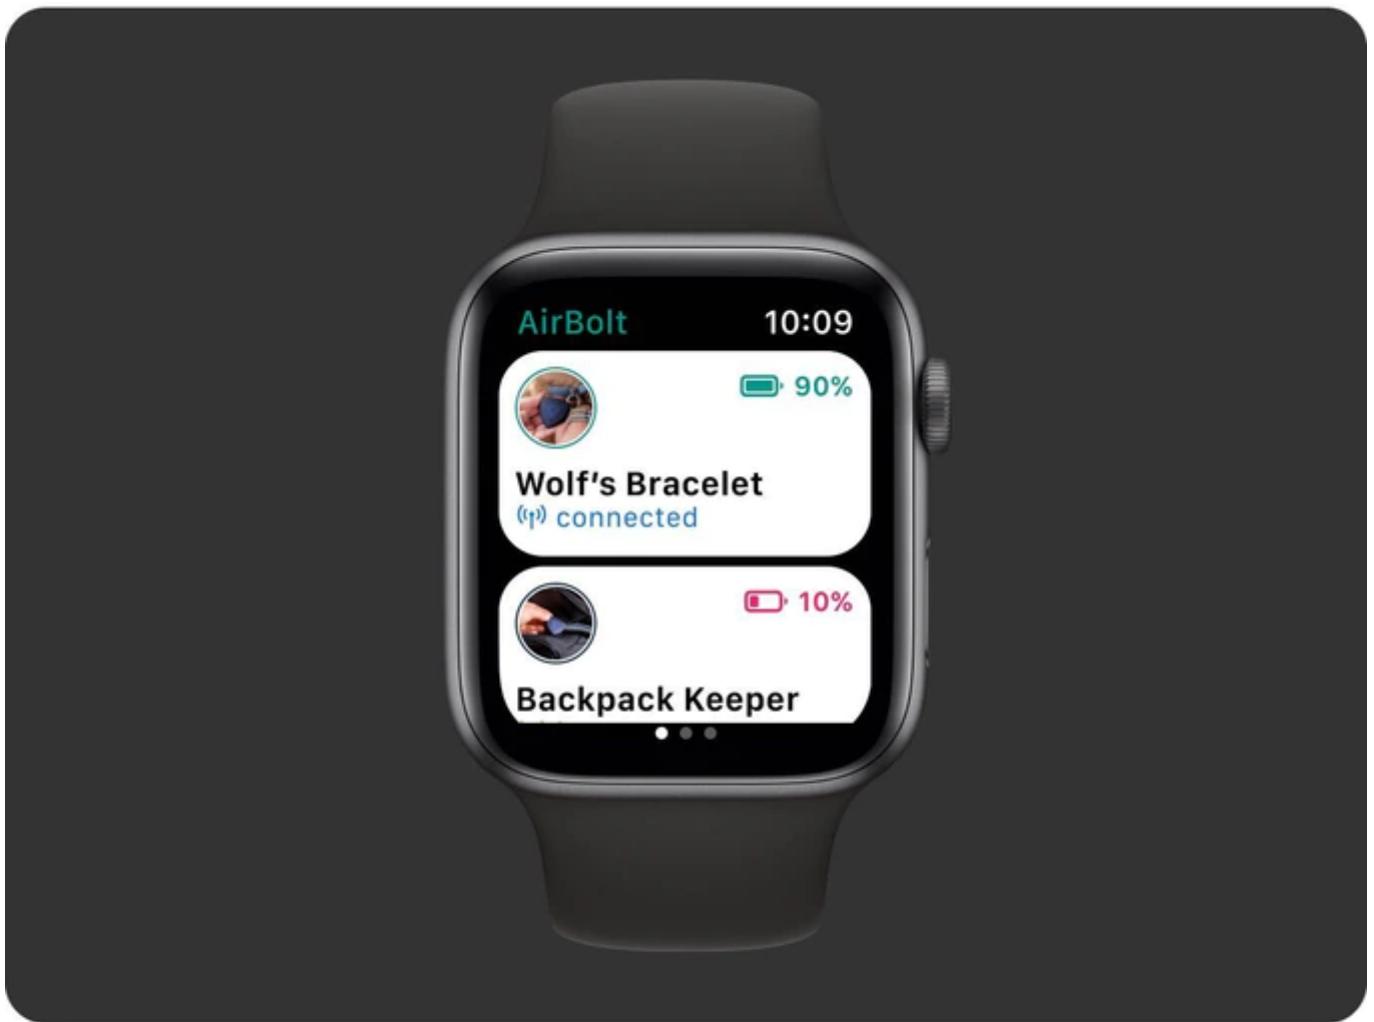

Web platform

You will also be able to control, manage, share and view location (and location history) of the /

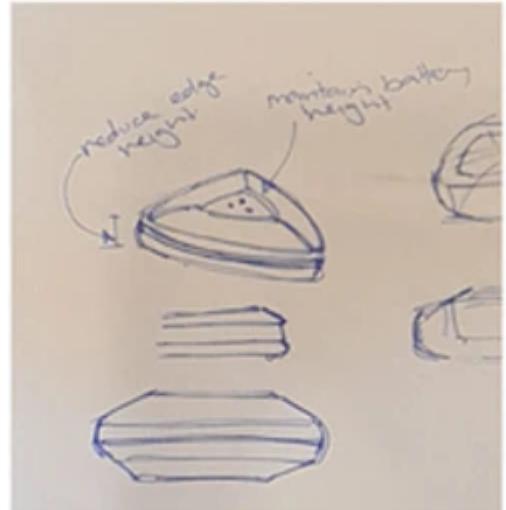

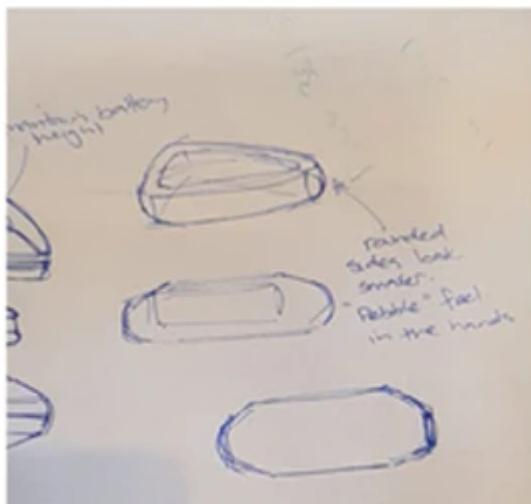

Along with this, you can locate your devices via Watch OS too!

The Concept

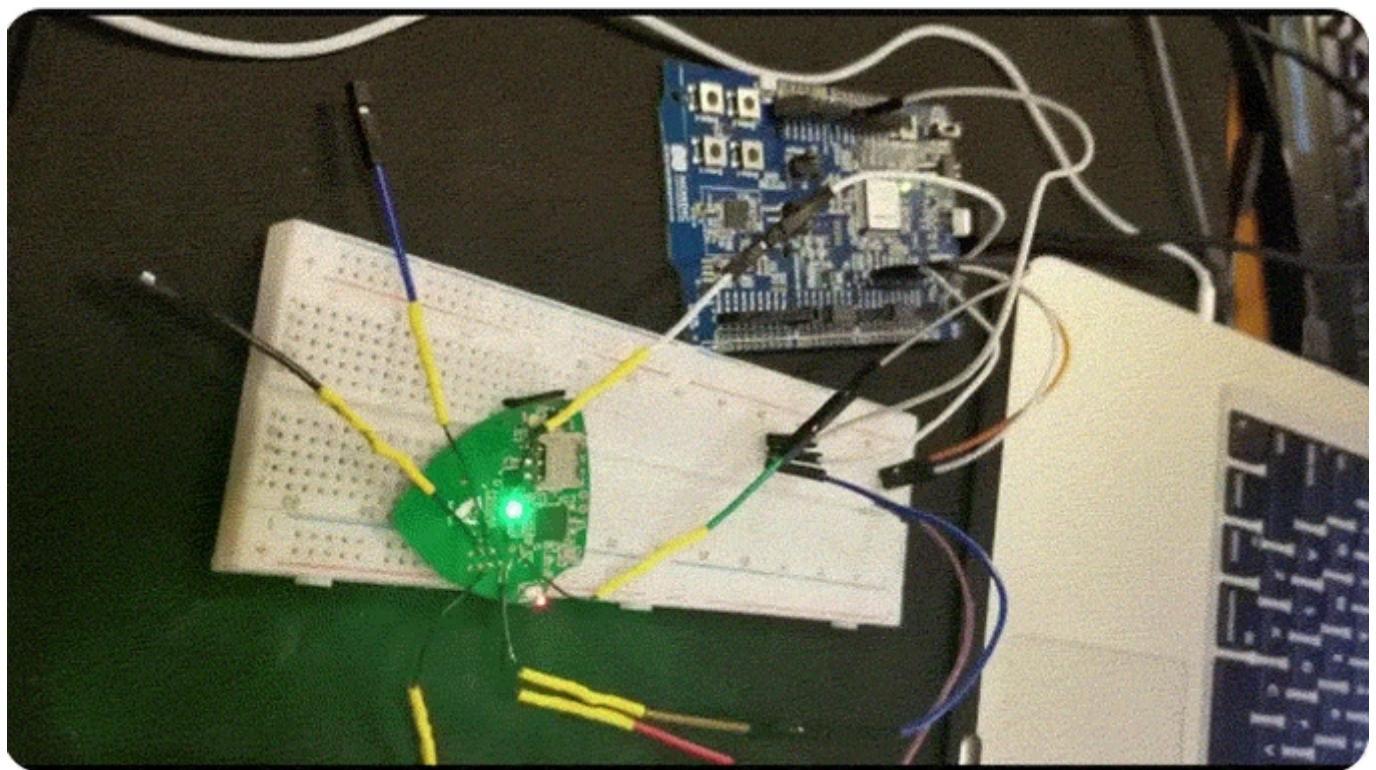

Development

AirBolt GPS: Prototype Demo

Subscription **not mandatory +
1 month free included**

AirBolt® GPS is a very small, very secure, very energy efficient and a powerful device. Our GPS can accurately track whatever you need to keep an eye on.

We don't impose travel time limits like some others. The AirBolt GPS, can be used for as long (FAQ for current coverage details).

To access this global network, we are offering our backers a significantly reduced subscription.

These rates will apply per device to each unit that you purchase through this campaign only. Consider extending the discount to them for that device!

We made our subscription extremely affordable. Indiegogo Special Price @ \$5.99 USD p/mth (estimated rate is \$10 USD p/month). That's just the price of a large coffee a month!

A subscription isn't mandatory. Contractors equipped with Bluetooth for nearby tracking are not required to have a subscription for this.

Sustainable materials

We aim to have The AirBolt® GPS become a must-have item for everyone. Therefore, our device is a product, the less the need to create unnecessary variations and the less wastage too; hence, we strive to provide coverage which is second to none. We have also meticulously chosen components which are rechargeable and typically has a life-cycle of 500 charges, meaning it will last for years. We have auto-resetting fuses. Every bit towards ensuring longevity is a part of our culture.
